

The BB32 features a 3-1/4" blade and a premium quality high torque universal motor, which maintains its power under heavy loads.

This machine is an economical alternative for cutting heavier weight materials such as upholstery and industrial fabrics; the double bevel blade eliminates material jamming between the blade and plate. Like all Eastman round knives, the Little Giant is perfect for cutting large radius curves and straight lines.

All Eastman machines are built with the highest grade materials available.

Specifications

Motors	110v, 1ph, 50/60Hz 220V, 1ph, 50/60Hz
Horsepower	.10 hp
Weight	4 lbs. 2 oz. (2.27kg)
Weight w/strip gauge	No
Blades	Standard: Carbon Round Optional: High Speed Round, Carbon Hexagon
Sharpener Stones	Standard: 120 Heavy Optional: 150 Medium, 220 Fine Note: Dual Wheel Sharpener is standard for Little Giant. Dual Wheel Sharpener is unavailable for Gentle Giant
Standard Features	No
Options	No
Blade Size	3.25in. (8.26cm)
Cutting Capacity	0.625in. (1.59cm)

Disclaimer: Achievable speeds and accelerations are tool-, material- and thickness dependent. All indicated speeds, dimensions, weights and performance data are approximate and subject to change without notice.

Features

Accuracy

Eliminated cutting distortion due to the Narrow Silhouette Standard and extremely low base plate

Stability

Vibration-free cutting with smooth and easy maneuverability

Efficiency

Simple handling of the machine due to its low center of gravity

Single-hand engaging of power supply via the Patented Uni-Safe Terminal Block and Attachment Plug
