

Eastman® PACEMAKER

MANUAL SPREAD MACHINE

Eastman's top-of-the-line manual spreader, the Pacemaker, can be utilized efficiently and with ease for face-up and face-to-face spreading.

This lightweight, economical machine combines strength and reliability to increase the productivity of your spreading operations.

The Pacemaker is equipped with end catchers, which automatically fold and clamp the fabric at each end of the spread.

Specifications

Max Width	No
Horsepower	No
Maximum Spread Height	8.5 in. (22 cm)
Maximum Cutting Capacity	No
Electrical Requirements	110V at 7 amps, 220V at 4 amps
Spreadable width (left or right hand)	No
Maximum Roll Weight	125 lbs. (57 kg)
Traverse Cutting Speed	No
Maximum Roll Diameter	24 in. (61 cm)
Blade Speed	No
Electric Power Requirements	No
Machine Weight	250 lbs. (113.4)
Operating Voltage	No
Maximum machine speed	No
Length of Pull	No

Disclaimer: Achievable speeds and accelerations are tool-, material- and thickness dependent. All indicated speeds, dimensions, weights and performance data are approximate and subject to change without notice.

Features

- Manual Edge Control
- Ply Counter
- End Catchers
- Expandabar
- Optional Features
- Automatic Infra-Red Edge Control
- Quick-Cut Attachment for face-up spreading
- Front or Double Upright
