

Eastman® Saber C-Series

Model: C-250 / C-550 / C-800 / C-1200 / C-1650 / C-2200

Material Spreading System

The Saber C-Series computerized, cradle feed machine is a robust yet smooth operating material spreading system with models suitable for up to 2,200 lb. rolls.

Spreader Intelligence™ combats varying tension within a roll by continuously measuring the angle deflection of the cloth as it feeds from the system, and compensates accordingly.

Specifications

Max Width	No
Horsepower	No
Maximum Spread Height	No
Maximum Cutting Capacity	No
Electrical Requirements	No
Spreadable width (left or right hand)	No
Maximum Roll Weight	No
Traverse Cutting Speed	No
Maximum Roll Diameter	No
Blade Speed	No
Electric Power Requirements	No
Machine Weight	No
Operating Voltage	No
Maximum machine speed	No
Length of Pull	No

Disclaimer: Achievable speeds and accelerations are tool-, material- and thickness dependent. All indicated speeds, dimensions, weights and performance data are approximate and subject to change without notice.

Features

- Programmable knife box for 30-50 bias cutting
- Spreads up to 110 yards / minute (100 meters/minute)
- Fast roll change, acceleration and braking
- Face-up and face-to-face spreading modes
- Roll loading equipment available
