

# Eastman<sup>®</sup> Saber Select

## Material Spreading System

The Eastman Saber Select™ positive feed system is designed for spreading rolls of material with weights up to 500 or 800 lbs. (227/363 kg).

Available in both semi-automatic and manual modes, the Select system features electric edge control and up to 80 yards/minute of spreading capabilities.

### Specifications

Max Width	No
Horsepower	No
Maximum Spread Height	No
Maximum Cutting Capacity	No
Electrical Requirements	110V or 220V
Spreadable width (left or right hand)	66 in. (1.6m)
	72 in. (1.8m)
	78 in. (2.0m)
Maximum Roll Weight	No
Traverse Cutting Speed	No
Maximum Roll Diameter	No
Blade Speed	No
Electric Power Requirements	No
Machine Weight	No
Operating Voltage	No
Maximum machine speed	No
Length of Pull	No

**Disclaimer:** Achievable speeds and accelerations are tool-, material- and thickness dependent. All indicated speeds, dimensions, weights and performance data are approximate and subject to change without notice.

### Features

- Face-up and face-to-face spreading
- Speed control handle with built-in direction switch
- Guided cut-off knife with motorized elevator lift
- 6 in. (15.24cm) spread height
- Contact the factory for additional features and specifications on the Saber Select
