

Lightweight easy-to-use Spreader.

Eastman's Turntable is a lightweight easy-to-use spreader.

When positioned at the end of a cutting table, the material is manually spread across the table.

The maneuverable spreader adjusts for face-up-one-way; face-to-face-nap-one-way; and face-to-face spreading.

To improve efficiency when spreading face-up-one way, a guided Falcon end cutter can be added to end cut each ply with perfect accuracy.

Specifications

Max Width	No
Horsepower	No
Maximum Spread Height	9 in.; 15 in. opt. (22.9 cm; 38.1 cm opt.)
Maximum Cutting Capacity	No
Electrical Requirements	No
Spreadable width (left or right hand)	No
Maximum Roll Weight	150 lbs. (68 kg)
Traverse Cutting Speed	No
Maximum Roll Diameter	24 in.; 48 in. opt. (61.0 cm; 1.2 m opt.)
Blade Speed	No
Electric Power Requirements	No
Machine Weight	125 lbs. (56.7 kg)
Operating Voltage	No
Maximum machine speed	No
Length of Pull	No

Disclaimer: Achievable speeds and accelerations are tool-, material- and thickness dependent. All indicated speeds, dimensions, weights and performance data are approximate and subject to change without notice.

Features

- Manual edge control

- Roll Bar

Optional Features:

- Falcon Cut Off

- Additional Lifter Arms

- Double Uprights

- Cloth Weights
