

3-Needle, Variable Top Feed, Interlock Stitch Machine

3-needle, variable top feed, interlock stitch machine with extremely small-sized cylinder bed for hemming.

UT4M: Pneumatic top cover thread trimmer and underbed thread trimmer with pressure foot lift

- * Hemming small-sized tubular goods, such as sleeve openings for children's wear and baby wear (hem width 15~30mm)
- * PEGASUS' unique "Oil Barrier" technology completely blocks oil leaking from the needle bar and the relevant parts while the machine is running, and even while the machine is stopped at night.
- * Equipped with a needle thread take-up mechanism, as part of the multi thread control system, soft or tight stitches can be easily selected according to sewing conditions.
- * Equipped with the world's smallest cylinder bed (circumference of the cylinder bed: 113 mm), this machine is most suitable for sewing small-sized tubular goods that was difficult to sew, increasing quality of sewn products.
- * The fabric is fed by the bottom feed belt and the top feed dog, so the machine goes through the cross seam sections smoothly. Thanks to this feature, neatly finished products can be obtained with no plyshift or twist on the fabric.
